

BSUN Energy Innovation Challenge 2016

Competition of Projects, Business Plans & Innovative Start-up Ideas in the Field of Sustainable Energy Solutions

On the occasion of the Global Entrepreneurship Week, the Black Sea Universities Network shall organize in collaboration with different BSUN member universities, several dedicated events. In this context, the event that shall be organized in Constanta, Romania is dedicated to put in forefront the problem of developing the entrepreneurial dimension of the students to emphasize the need for development of skills and the abilities in this field.

The event from Constanta shall be organized in cooperation with “Ovidius” University of Constanta and shall be addressed to the students from BSUN member universities, but also to the students from other universities, to students from different high schools and young graduates.

The topic of the event is dedicated to the field of sustainable energy, the promotion of value chains based on decarbonized technologies, the use of advanced materials for increasing the efficiency for the systems of conversion and conservation of energy, the promotion of IT technologies and the use of smart grid through ecoinnovative solutions.

Concept

The event consists on the following components: a plenary session which will introduce the current status of entrepreneurship in the energy sector, a session of posters with innovative business proposals and ideas of start-ups in promoting the solutions for power supply and use, a contest of business ideas in the front of a panel of evaluators and a Workshop on „Ecoinnovation in energy system using nanostructured materials”.

Aim

The event is aiming to enhance the entrepreneurial and innovative potential of the young generation based on education and scientific research in the field of sustainable energy production and use. The attendance of such a competition has the benefit for the young potential entrepreneurs to get acquainted on future challenges and activities in order to facilitate the initiation of successful start-ups.

Partners

This competition is organized by Black Sea Universities Network together with “Ovidius” University of Constanta – The Faculty of Mechanical, Industrial, and Maritime Engineering, and the Institute for Nanotechnologies and Alternative Energy Sources, Cluster Danubius- Black Sea (3D-BS) and Medgreen Cluster.

Program

Place: Aula Magna, “Ovidius” University of Constanta, 124 Mamaia Avenue.

Date: November 18th, 2016

09:00 - Registration of the participants

09:30- Opening Ceremony

10:00- *Keynote Speeches*

Adriana MIRCEA, General Electric, Romania

Iulian HORNET, President of EcoHornet SRL

10:30- Coffee Break

Attending of the Posters Panel

11:00 - Presentation of the Projects in front of the Evaluation Panel

13:00 - Buffet lunch

14:00 - Workshop on „Ecoinnovation in Energy Systems using Nanostructured Materials”

16:00- Closure
